Ideation Phase
Empathize & Discover

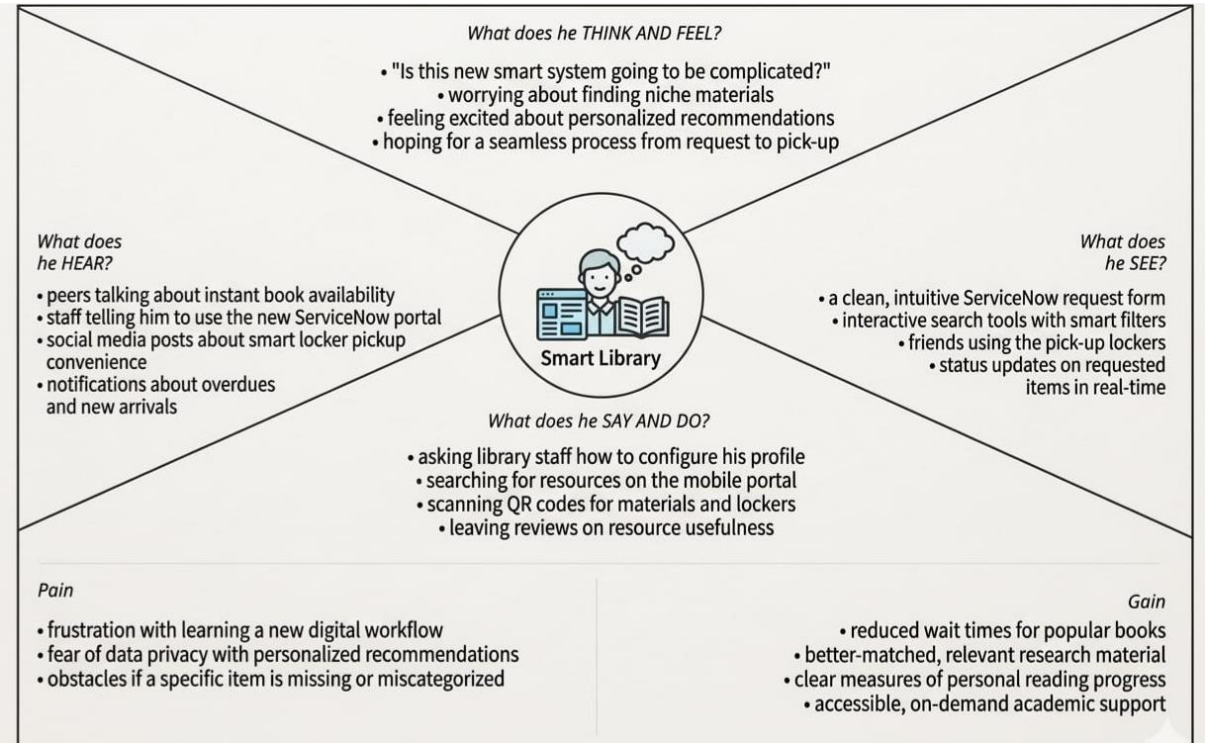
Date	08 April 2026
Team ID	SWTID-2026-2921
Project Name	Smart Library Request Workflow in ServiceNow
Maximum Marks	4 Marks

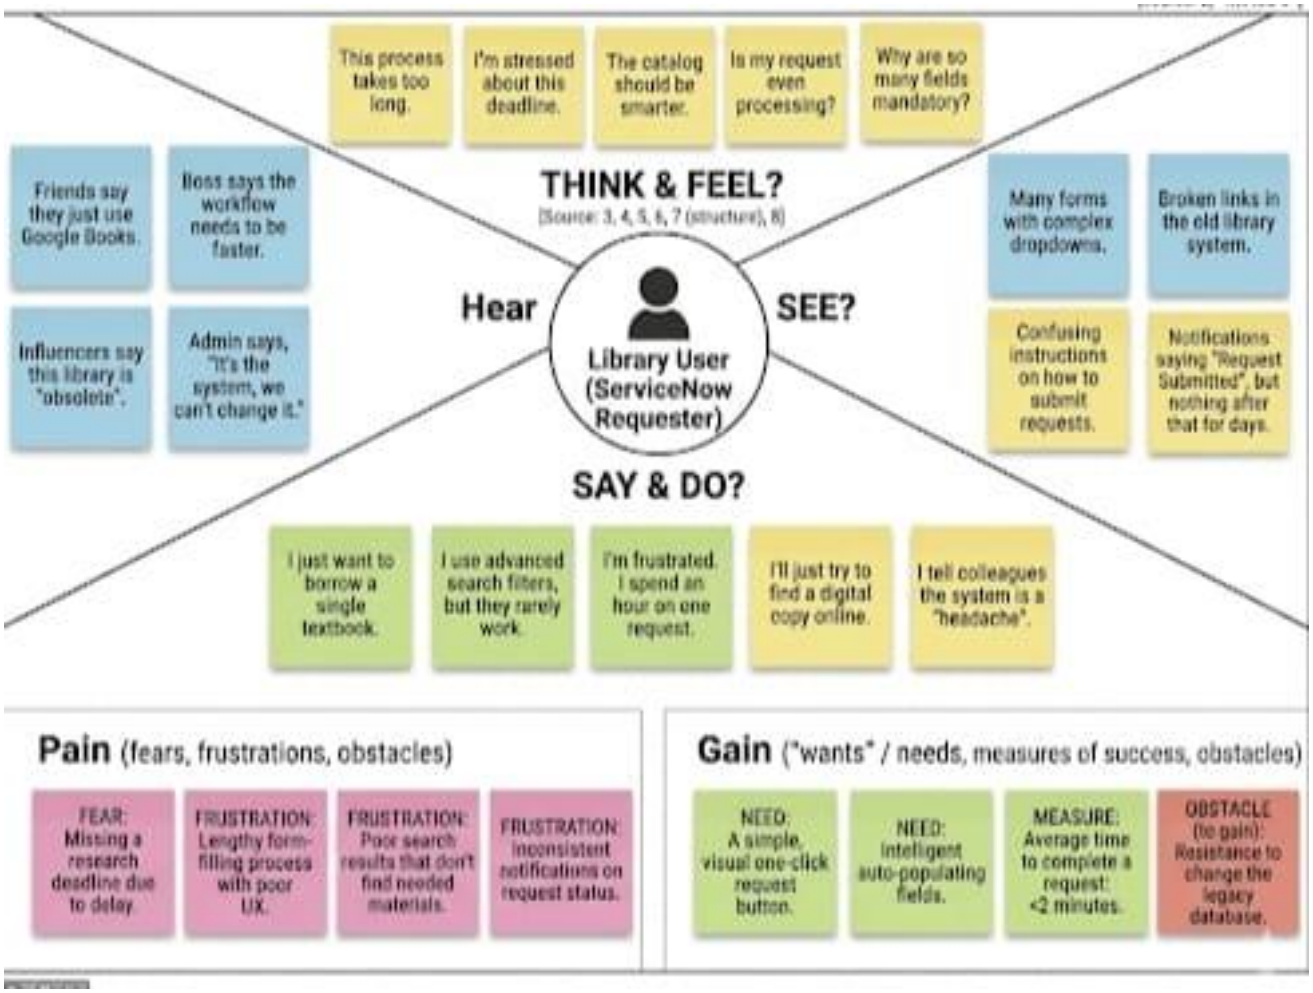
Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.
An empathy map is a fantastic way to step out of the "technical requirements" headspace and into the shoes of the people actually using the ServiceNow portal.

For a **Smart Library Request Workflow**, we generally have two primary personas: the **Library Patron** (The Academic/Employee) and the **Librarian/Fulfillment Agent** (The ServiceNow User).

Example:





Pain (fears, frustrations, obstacles)

- FEAR: Missing a research deadline due to delay.
- FRUSTRATION: Lengthy form-filling process with poor UX.
- FRUSTRATION: Poor search results that don't find needed materials.
- FRUSTRATION: Inconsistent notifications on request status.

Gain ("wants" / needs, measures of success, obstacles)

- NEED: A simple, visual one-click request button.
- NEED: Intelligent auto-populating fields.
- MEASURE: Average time to complete a request: <2 minutes.
- OBSTACLE (to gain): Resistance to change the legacy database.
