Project Planning Logic

Smart Library Request Workflow

Agile Sprint Planning Document

Key Concepts

Term	Definition
Sprint	A fixed period or duration in which the team works to complete a set of library workflow tasks.
Epic	A big feature or module too large to complete in one sprint — broken into smaller stories (e.g., 'Request Management Module').
Story	A small, deliverable task that is part of an Epic (e.g., 'Build book search API').
Story Point	A number representing effort required for a story — expressed in Fibonacci series (1, 2, 3, 5).

Story Point Scale

- 1 — Very Easy task (e.g., add a label/field)
- 2 — Normal task (e.g., simple API endpoint)
- 3 — Moderate task (e.g., form with validation)
- 5 — Difficult task (e.g., complex workflow logic)

Maximum Story Point per Story = 5 (Scale: 1, 2, 3, 5)

Sprint 1 — Foundation & Data Layer

◆ Epic 1 — Member & Catalogue Management

USN1 Member Registration & Profile Setup **[2 SP]**
USN2 Book Catalogue Import & Indexing **[1 SP]**

◆ Epic 2 — Request Intake Module

USN3 Book Search & Availability Check **[3 SP]**
USN4 Request Submission Form & Validation **[3 SP]**
USN5 Request Queue Management (Staff Side) **[3 SP]**

Total Story Points in Sprint 1 = 2 + 1 + 3 + 3 + 3 = 12 SP

Sprint 2 — Fulfillment, Notifications & Dashboard

◆ Epic 3 — Fulfillment & Tracking

USN6 Request Assignment to Librarian **[2 SP]**
USN7 Inter-Branch Transfer Workflow **[2 SP]**
USN8 QR-Based Self-Checkout for Requests **[2 SP]**
USN9 Return & Renewal Processing **[4 SP]**

◆ **Epic 4 — Notifications & Alerts**

USN10 Real-Time SMS/Email/App Notifications **[5 SP]**

◆ **Epic 5 — Analytics & Reporting**

USN11 Librarian Dashboard & Demand Reports **[5 SP]**

Total Story Points in Sprint 2 = 2 + 2 + 2 + 4 + 5 + 5 = 20 SP

Velocity Calculation

Sprint	Epics	Stories	Story Points
Sprint 1	Epic 1, Epic 2	USN1–USN5	**12**
Sprint 2	Epic 3, Epic 4, Epic 5	USN6–USN11	**20**
Total	**5 Epics**	**11 Stories**	**32**

Total Story Points = 12 + 20 = **32 SP**
Number of Sprints = **2**
Velocity = Total Story Points ÷ Number of Sprints = 32 ÷ 2 = **16 Story Points per Sprint**

> ✅ Your team's velocity for the Smart Library Request Workflow project is **16 Story Points per Sprint**
